

# Catch Up Lesson

- This lesson is for those who missed the last week of school when we were open.
- You must complete the assessment and return it to me by email or by sharing the file with me.
- You DO NOT need to complete this lesson if you have ALREADY done your assessment.

# Title: God vs Science

04/04/2020

Learning Objective: To compare religion to science for assessment.

## Do Now

1. What is the main scientific theory about the creation of the universe?
2. List 3 facts about this theory.

## Five to start

- 1 Collect equipment & book and sit in seat.
- 2 Open book, write the date, title, LO & answer Do Now questions.
- 3 Answer name for register.
- 4 Self-assess using the mark scheme in red pen. Write down key word.
- 5 Listen to LO.

## Keywords – Copy into your book

Intelligent Design – the idea that the universe is too complex to have been created just by chance.

# Title: God vs Science

04/04/2020

Learning Objective: To compare religion to science for assessment.

## Do Now

1. What is the main scientific theory about the creation of the universe?
  - **The Big Bang Theory**
2. List 3 facts about this theory.
  - **The universe is expanding, lightwaves are stretching, it has a beginning and end.**

## **Five to start**

- 1** Collect equipment & book and sit in seat.
- 2** Open book, write the date, title, LO & answer Do Now questions.
- 3** Answer name for register.
- 4** Self-assess using the mark scheme in red pen. Write down key word.
- 5** Listen to LO.

## Keywords – Copy into your book

Intelligent Design – the idea that the universe is too complex to have been created just by chance.

“You can’t believe scientific theories like the Big Bang are true and also believe in God”

**Agree because...**

**Disagree because...**

# Can you believe in God and Science?

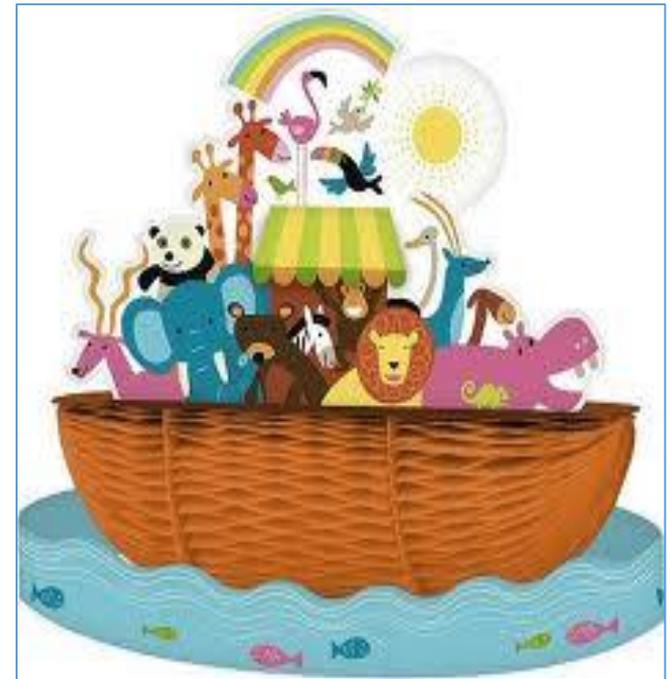

## **Reason One:**

- Scientific explanations are true. However, this doesn't mean that everyone should be atheist or agnostic.
- Science could prove that God created the universe. This is because of the following arguments:
  1. The Big Bang had to be at exactly the right micro second. If it had been too soon, it would have been too small to form stars. If it had been too late, everything would have flown away too fast for stars to form.
  2. There had to be scientific laws such as gravity for the matter of the universe to form solar systems, and only God could have created these laws.
  3. Life on earth needs carbon to bond with four other atoms and water molecules. This could not have happened by chance so God must have made it happen.

# Can you believe in God and Science?

## Reason Two:

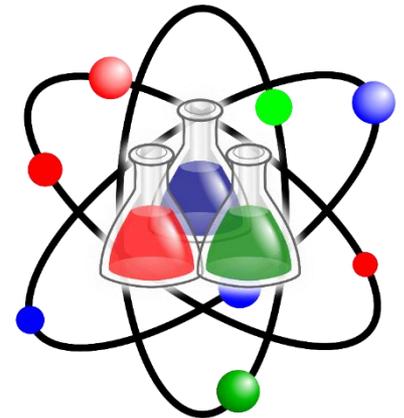

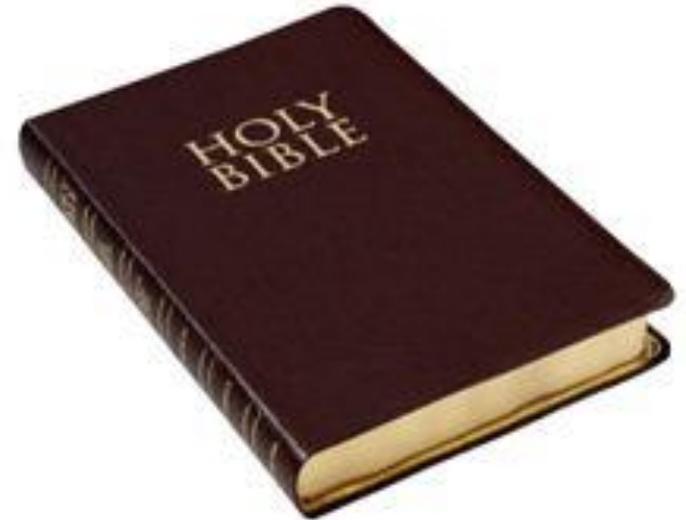

- Science is wrong and the Bible is right.
  - Evidence of the Big Bang and evolution can be explained by the effects of Noah's flood and the Apparent Age theory.
  - The Apparent Age theory claims that when Adam was made, the earth was six days old, but to Adam it would have looked billions of years old because of the way God created it.
  - They believe science is wrong and the Bible is right.
- This idea is known as creationism.

# Can you believe in God and Science?

## **Reason Three:**

Both the Bible and scientific explanations are correct. The main points of the Bible story fit in with science. One of God's days could be millions or billions of years. In Genesis 1:3 'God said, "Let there be light"'. They say this is a reference to the Big Bang.

# Assessment

- Now complete the assessment in the word document.
